Core Competencies

Belay Technologies is a Service-Disabled Veteran-Owned Small Business providing leading edge technology and engineering services to the DoD, as well as state-of the-art Commercial products. Belay is a subject matter expert in automation and virtualization of tasks.

Capabilities:

- Software Development
- Front-End Development
- Automated Software Testing
- PKI Enabling Web Applications
- Tailored Framework Development
- Database/System Administration
- Virtualization
- Web Design
- Systems Integration

Expertise:

Windows	Google Analytics	NetBackup	Certified Ethical Hacker
Linux	React	CentOS	Remedy
Java	NodeJS	RedHat	Apache NiFi.
Javascript,	AngularJS	VMware	CNO/CND exploitation
Google Cloud	ElasticSearch	Wireshark	attack tools, techniques
AWS	JSON	Data Analytics	and procedures
Azure	Tomcat,	CompTIA Security +	Wireless Network protocols
Ruby on Rails	MongoDB	Cisco	Keyhole Markup
SQL/MySQL	Accumulo	TCP/IP, SMTP, VPN,	Certified GIAC Auditor of
SOAP/REST	Python	DHCP, DNS	Wireless
DevOps	Maven	Citrix	Adobe Dreamweaver
Perl	PowerShell	Active Directory	Adobe Illustrator
Puppet	Bash	Gateway	Google Certified
Splunk	Ajax	DFS Management	
HTML/CSS/PHP	XML	SharePoint	

Differentiators

Belay Technologies provides innovative solutions to increase productivity and reliability while decreasing costs for our customers. We created and maintain a patented, customized tool: SummitRTS Automated Framework.

SummitRTS automates provisioning, execution, and results gathering for software and custom package testing. SummitRTS can provision a single node or an entire range and scales from running on a single laptop to large scale data clouds like Azure, AWS, and Google Cloud Platform.

Our teaming efforts and proposal contributions have made us a sought-after teaming partner on many initiatives within and beyond DoD.

Past Performance

Belay Technologies designs, engineers and develops solutions that increase customer productivity while reducing overall costs. Belay employees take team lead roles across multiple contracts and have been regularly recognized for their leadership and technical capabilities.

Belay employees have developed and maintain applications for automated provisioning and testing, fast credential management and access control, and modernization of existing applications.

Belay employees also provide IT support, threat mitigation, sustainment, cyber analytics support and network and systems administration for Global Access efforts.
